Lower Limb Prosthesis Cover

Light  
Flexible  
Transtibial  
cosmetics

The majority of amputees not only want to recapture the function they lost, but also want a cosmetically appealing option.

To fulfill this desire, Primacel offers different **Cosmetic foam covers**.

All foam covers have a drill hole that differ in diameter and form to accommodate various modular components. For transtibial prostheses, we offer drill hole diameter of 30 mm or 34 mm to match tube adapters and tube clamp adapters.

Primacel produces foam and foam aesthetics for over 15 years already with more than 500,000 pieces thanks to the trust of its customers around the world.

**Cosmetic foam cover (CFC)** for modular transtibial prostheses have 30mm or 34 mm drill hole diameters and are not pre-shaped. They can be applied to either the left or right side.

Primacel **Cosmetic foam cover** are also available in FLEX quality to provide more elasticity and a softer touch.

Product	Material	Length	Tube diameter
